RAJESH KUMAR MAMBULLI

Senior Data Analyst - Data Sciences

Address: Hyderabad, India
Contact: +91 7993924560
Email ID: rajeshmambulli@gmail.com
LinkedIn URL: Rajesh Mambulli

Professional Summary

Data analyst with 6+ years across healthcare finance, banking risk reporting, and enterprise analytics. Strong Python and SQL practitioner with a track record of automating data pipelines, building variance/forecasting models, and delivering decision-ready dashboards. Experienced in descriptive, diagnostic, and predictive analytics, data quality controls, and stakeholder collaboration. Internal Optum experience in Revenue Analytics; eager to apply for senior data analytics and data sciences positions.

Core strengths: analytical problem-solving, pricing/financial modeling, automation, data validation, ad-hoc analysis, technical documentation, cross-functional collaboration.

Technical Skills

Python | R Programming | SQL | Microsoft Power BI | Tableau | Model Development | Exploratory Data Analysis(EDA) | Data Analytics | Data Sciences | Predictive Modeling | Web Data Scraping | SAP Material Management | Hypothesis Testing | Project Management | Statistical Analysis | Stakeholder Collaboration | Data Quality Analysis | Linear Regression | Logistic Regression | Machine Learning | Big Data Analytics | Pandas | NumPy | Data Wrangling | GitHub | Version Control Systems

Professional Experience

UnitedHealth Group (Optum), India — Senior Finance Analyst, (Apr 2025 – Present)

- Actively driving partnerships with business leaders and teams to continuously enhance operations and leverage data insights for better business performance.
- Leading the Advanced Analytics initiatives within the Revenue Analytics function, with a focus on automating revenue reporting processes critical to healthcare operations.
- Driving the automation of the Renewals Pipeline Reporting project using a combination of Python and SQL, resulting in streamlined workflows, reduced manual errors, and improved reporting efficiency.
- Led the Velocity Pipeline automation project, utilizing Python and SQL to optimize New Sales financial reports, reduce manual intervention, and accelerate data delivery for improved business decision-making.
- Designed and implemented the Foresight+ Variance Tracker, a dynamic reporting tool built with advanced Python, SQL and Excel to monitor week-over-week fluctuations across multiple revenue ledger components - such as Budget, Month Close, and Year-over-Year- enhancing early detection of anomalies and decision-making accuracy.
- Developed the M-Power Variance Tracker, enabling real-time comparison between current and previous week revenue figures to validate financial changes prior to downstream integration with systems like Foresight+, significantly improving data reliability and audit readiness.

First Citizens Bank (India) — Data Analyst, (Oct 2023 – Apr 2025)

- Integral member of the Large Financial Institutions Reporting function, specialized in Information Providing Entities (IPE) reports essential for stress testing the bank's financial health using Critical Data Elements, submitted to the Federal Reserve Board (FRB).
- Spearheaded the automation of 15 out of 17 manual IPE reports which accumulates 56 critical data elements using a combination of Python and SQL queries, significantly streamlining the reporting process, reducing errors, and enhancing efficiency.
- Played a crucial role in refining the precision and promptness of IPE reports, ensuring compliance with regulatory mandates and advancing the bank's risk management framework.
- Leveraged SQL queries to verify data consistency for certain critical data elements across layers of the enterprise data warehouse, ensuring the integrity of every report.
- Identifying and resolving data quality issues, contributing to improvements in data governance practices.
- Provided SQL query results to respective data owners to address discrepancies between reports and database outputs, facilitating accurate and reliable reporting.
- Built automated reports using Python and SQL based on Current Expected Credit Losses (CECL) and Financial Close Optimization (FCO) reports for tracking the Data Rule Exceptions of Critical Data Elements.

Infosys Limited (India) — Data Science Analyst (Oct 2022 – Sep 2023)

- Workforce Analytics: Designed and delivered comprehensive Actual and Planning Talent status reports for all Infosys business segments. These reports helped the Talent Planning and Deployment (TPD) team monitor demand and supply fulfillment more effectively, improving workforce planning and resource allocation.
- Resource Optimization: Developed the Subcon Replacement Suggestions report, providing recommendations to replace matured subcontracts with offshore talents possessing similar skills and experience. This initiative reduced costs and improved project delivery efficiency.
- Predictive Analytics: Leveraged Machine Learning algorithms to create Forecasting Reports that predicted demand and supply (capacity) for talent across various skills and business segments. These reports provided actionable insights, enabling the TPD team to plan proactively for future workforce needs.
- Strategic Insights: Analyzed trends in demand movement and top skills required across business segments in previous quarters. Presented actionable insights to senior management to guide strategic workforce planning and decision-making.
- Performance Metrics: Developed KPI reports, including the Utilization Report for all Infosys business segments, which analyzed the performance of production and non-production talent. These reports helped optimize resource allocation strategies and evaluate workforce efficiency.

TechnipFMC (India) — Associate Quality Analyst (Jun 2019 – Jul 2022)

- Spearheaded the development of comprehensive supplier KPIs focusing on Cost of Non-Quality (CNQs) and Global Corrective Action Reports (CARs), enhancing supplier performance evaluation processes.
- Led the creation and maintenance of weekly savings metrics for Engineering and Quality teams, facilitating data-driven decision-making and cost optimization initiatives.
- Conducted in-depth scrapped parts analysis, providing valuable insights to Engineering and Manufacturing units at TechnipFMC's HYD plant, resulting in improved efficiency and waste reduction.
- Established key performance indicators (KPIs) for TechnipFMC's manufacturing plant in Moula-Ali, including Overall Equipment Efficiency (OEE), Plant Downtimes, driving operational excellence and performance tracking.
- Developed and continuously updated Supplier Quality Dashboard integrating HSE data and Non- Conformance

Dashboards, enhancing visibility into supplier performance and quality standards.

- Generated and maintained ATS (Authorization to Ship) KPI reports for global review, ensuring alignment with organizational objectives and quality standards.
- Conducted comprehensive part reviews for TechnipFMC's India and North America regions, emphasizing part and document quality as primary parameters, contributing to enhanced product quality and compliance.
- Facilitated supplier training and implemented Supplier Quality Improvement initiatives in accordance with TechnipFMC Operating Procedures, fostering a culture of continuous improvement and supplier excellence.

Education

2024 - Sep 2025	• Post Graduate Program in Data Science & Business Analytics from **The University of Texas, Austin**
	with GPA of **3.69** out of **4.33.**
2015 – 2019	• Bachelor of Technology in Mechanical Engineering from **K L University, India**
	With CGPA of **7.95** out of **10.0**

Certifications

- Certified in Google Data Analytics Specialization- Google
- Certified Data Analysis with Python - IBM
- Mastered Python Programming for Data Sciences through Great Lakes Executive Program.
- Achieved SQL certifications (Basics & Intermediate Levels), Udemy & Hacker Rank.

Awards and Recognition

- Received Bravo from Finance Vice President of Optum, for building various value-added data reports.
- Star Performer from Credit Administration of First Citizens Bank for being a key player om LFI reporting automation project.
- Received prestigious global acclaim from the Senior Vice President of Infosys for exceptional talent planning and deployment insights.
- Earned accolades from the Director of Manufacturing and the Supplier Quality Manager at TechnipFMC for innovative development of performance assessment dashboards.
- Awarded Silver recognition at TechnipFMC for pioneering data entry automation through Power Automate.
- Authored groundbreaking research on MR damper systems and assumed pivotal leadership roles in university-level engineering projects.
